

POSTING INSTRUCTIONS - RTB INBOUND CALLS

NOTE: RTB IDs are listed at the end of this document

POST Methods

JSON

URL:	https://rtb.ringba.com/v1/production/<<RTB ID>>.json
Header:	Content-Type: application/json
Body:	{ "CID": "18885557777", "exposeCallerId": "yes", "zipcode": "99999" }

XML

XML	
URL:	https://rtb.ringba.com/v1/production/<<RTB ID>>.xml
Header:	Content-Type: application/xml
Body:	<bid_request> <CID>18885557777</CID> <zipcode>99999</zipcode> </bid_request>

GET Methods

JSON GET URL:

https://rtb.ringba.com/v1/production/<<RTB ID>>.json?CID=18885557777&zipcode=99999

XML GET URL:

https://rtb.ringba.com/v1/production/<<RTB ID>>.xml?CID=18885557777&zipcode=99999

NOTE: When you receive a bid from us, it is important that the RTB response data be quickly parsed and utilized properly, or the call may be rejected.

IMPORTANT: Calls must be transferred to the `phoneNumber` (or `phoneNumberNoPlus` or `sipAddress`) within the `expireInSeconds` number of seconds. Otherwise, the call will be rejected and a new bid must be created by sending another request.

Sample Response Data:

```
{
  "bidId": "RTB878g63ng66ed5858ab894b020gfdeh71",
  "bidAmount": 90,
  "expireInSeconds": 120,
  "bidExpireDT": "8/25/2025 6:13:26 PM +00:00",
  "bidExpireEpoch": 12135317547,
  "phoneNumber": "+18186938382",
  "phoneNumberNoPlus": "18186938382",
  "sipAddress": "RTB878g63ng66ed5858ab894b020gfdeh71@rtb.ringba.sip.telnyx.com",
  "bidTerms": [
    {
      "code": 101,
      "description": "Call must connect"
    }
  ],
  "warnings": [
    {
      "code": 205,
      "description": "Sending calls via SIP is preferred over routing them to DID. DID numbers are not unique and are not protected from receiving spam calls or calls related to expired bids. Consider always providing Caller ID when not using SIP."
    }
  ]
}
```

Property Name	Property Description
bidId	The Ringba ID for the bid. Can be used later to look up details.
bidAmount	The \$ amount the buyer is bidding for the call.
expireInSeconds	The number of seconds you have to transfer the call to the buyer. It is very important that the call be transferred within this time period or the call will be rejected.
bidExpireDT	The datetime stamp when the bid will be

	considered expired.
bidExpireEpoch	The datetime stamp in Epoch format when the bid will be considered expired.
phoneNumber	The phone number that the call must be immediately transferred to. Includes the + sign.
phoneNumberNoPlus	The phone number that the call must be immediately transferred to. Does not include the + sign.
sipAddress	SIP address alternative to the phone number options above.
bidTerms	Terms of the Bid. Exact terms and parsing implementation steps will vary.
warnings	Warning messages with suggestions to help optimize the call.
	Please contact support@ringba.com for any questions or assistance getting parsing steps configured.
Required Tags (rtbID is only required for Ringba Users)	Token
Zipcode	[tag:Geo:ZipCode][tag:Address:Zip5][tag:Address:Zip4][tag:gather:zipcode][tag:User:zip][tag:User:Zipcode][tag:User:ZipCode]
CID	[tag:InboundNumber:Number-NoPlus]
Phone	[tag:InboundNumber:AreaCode][tag:InboundNumber:Prefix][tag:InboundNumber:Suffix]
Publisher ID	[tag:Publisher:Id]
Publisher Sub ID	[tag:Publisher:SubId]
Publisher Name	[tag:Publisher:Name]
Campaign Name	[tag:Campaign:Name]
Campaign ID	[tag:Campaign:Id]
rtbID	[Call:InboundCallId]
Multiple Zip Codes - Passing zipcode as the following syntax will accept all possible zip fields vs just one that might be available	[tag:Geo:ZipCode tag:Address:Zip5 tag:Address:Zip4 tag:gather:zipcode tag:User:zip tag:User:Zipcode tag:User:ZipCode]
NOTE: RTB IDs are listed at the end of this document
